What can Infrared Saunas do?

Detoxification

Toxins are flushed out through sweat as a result of increased blood circulation.

Pain Relief

Infrared heat relieves pain by dilating the blood vessels. Increased supplies of oxygen and nutrients help in healing and reducing pain.

Arthritis

Heat releases tense muscles and cramps that have been formed in response to aching and stiff joints.

Fibromyalgia

Weight Loss

Burn 600 calories in a 30 minute sauna session which is equal to 6 miles of running.

Cardiac Health

It is an effortless workout for your heart.

Beautiful Skin

Heat deep cleanses the skin and helps to eliminate all the toxins through sweat.

Skin conditions

Sauna session is known to help in certain skin conditions like acne, psoriasis and eczema.

Stress Relief

Infrared heat helps to relieve mental stress and fatigue by increasing the blood flow and supplying more nutrition, oxygen and hormones (endorphins) to the tissues.

Refreshing Sleep

Relieving mental and physical stress in sauna helps to induce refreshing, deep sleep and makes you feel happy and energetic.

Sports Fitness

Infrared heat increases blood circulation, heart rate and metabolism. All these elements contribute towards a healthy heart and also flexibility is improved due to heat. All these factors combined together give increased sports performance.
